## 3 month stipend available for field work in Vietnam

A short-term postdoc stipend is available for a pilot project led by Dr. Abigail Walter of SLU and Dr. Kris Wyckhuys of CIAT. In the project, we will examine tritrophic interactions involving cassava, invasive pathogens and herbivores, and the native insect herbivore and natural enemy communities. We are now looking for a postdoc to do 3 months of field work collecting and identifying insects in Vietnam, with a start date between November 2015 and January 2016.

If you are interested in doing field work in Vietnam, and you have field and/or taxonomic experience please contact us! We can provide a 3 month stipend from SLU plus travel and living expenses in Vietnam. In order to be eligible for the stipend you must have obtained your PhD less than 3 years ago, have never been employed by SLU, and have received less than 24 months of stipend from SLU previously. Swedish citizens are not eligible for stipends. No previous SLU affiliation is needed to apply.

If you are interested, please send your CV and letter of interest to [abigail.walter@slu.se](mailto:abigail.walter@slu.se) by 20 August, 2015.
